

Game Changer

The team makes the difference

Ever watched a TV game show and thought, “We could do that!”? Now’s your chance to prove it. In Game Changer, you step into the action and challenge your colleagues in a fast-paced game show combining music, geography, history and logic.

The questions appear on a big screen, and lively discussions break out around your team. Someone recognises a song from the very first note, while another knows exactly where to place the pin on the map. You weigh up the answers, discover unexpected talents and try to agree—should you trust your gut or the colleague who seems absolutely certain?

Throughout the competition, you’ll face four challenges:

Hitster – you know the song, but can you remember the year? Familiar hits bring back memories and have everyone itching to sing along. Your challenge is to place the songs in the correct order on the timeline. Did that one come before or after that unforgettable summer hit?

Time Traveller – put history in its place
Travel through time and place historical events and landmarks on the timeline. What seems obvious at first soon sparks a lively debate as your team tries to work out what actually came first.

Closest Wins – where in the world are we?
Place your pin on the map and show who knows the world best. You don’t have to get it exactly right, but you do have to get closer than your opponents. Every guess could make the difference!

The 1% Question – who can crack the puzzle?
It starts off easy, but soon you’ll need to think a little harder. These puzzles challenge your logic and your ability to find fresh solutions. Sometimes, the quietest person at the table suddenly spots what everyone else has missed.

Game Changer brings colleagues together through laughter, excitement and those unforgettable “How did we miss that?” moments. Your different strengths become the team’s greatest asset, and anyone could come up with the decisive answer. In the end, one team takes the win, earning gold medals and bragging rights at the next coffee break.
