

City Sailing

Hoist sail in the middle of the city

The wind fills the sails, the water sparkles in the sunshine and you get to see our beautiful capital from a new perspective, with salt spray in your hair and a feeling of freedom in your chest.

Here you can combine the best of both worlds: the pulse of the city streets and the calm of the vastness of the sea. Whether you are eager to take command, steer, navigate and hoist the sails – or rather sit back and enjoy the view from the cockpit – this is the experience that makes everyone feel alive.

You shape the sailing trip exactly as you want. Maybe an after-work at sunset? An adventure for the team?

With an experienced skipper at the helm, there is both security and expertise – the rest is up to you.

Stockholm from the water is something very special. A memorable experience for both returning and first-time visitors.

Each boat can accommodate up to 12 people – perfect for all types of groups looking to share something out of the ordinary.
