

RIB Speed Sensation

Explore Stockholm from the water

A city built on islands should, of course, be seen from the water. Here, guided sightseeing through the central parts is combined with a true high-speed experience in the scenic archipelago.

The tour starts and ends in the heart of central Stockholm and takes you out into the stunning archipelago at high speed and with maximum proximity to the water. From the very first moment, you experience the city from its true perspective – the seaside – as we pass iconic landmarks and head out towards the open archipelago landscape.

With the RIB boat's power, stability, and agility, you get a high-speed and dynamic experience where every turn and acceleration is felt for real.

The contrast between the city skyline and the archipelago's rugged nature, low-lying islands,

and sparkling waters make the tour both spectacular and memorable.

Our experienced drivers navigate safely through fairways, narrow straits, and open waters with great precision and local knowledge. You can focus on the experience while we take care of the safety.

On board, you sit comfortably on jockey seats designed for both speed and comfort. All passengers are, of course, equipped with flotation suits, life jackets, goggles, and gloves when needed, so you stay warm and dry.

Prices are based on departure from and/or return to Stockholm's harbour. If other pick-up or drop-off locations are requested, the price may be adjusted.
